Campaigning a VY commodore Ute, powered by a 5.7 litre v8, Geelong based Richard McNay and Aaron Blacksell #564 have plenty of fun in their Class 5 machine. Basically a daily road car, the commodore has a standard front and back end which is supported by heavy duty springs plus the reliable Murray Coote shocks which aid the ride. Although it's not all hard going for Richard and Aaron, who possess the comfort of powered windows and air-conditioning, which they regularly use!

Originally starting out as a damaged tradies ute purchased from the auctions for a bit of cheap amusement, years later the only changes to the vehicle have being a power boost to a LS1 V8 and a new 6 speed transmission. Over the years Richard and Aaron have forged their own passion for off road racing and in particular a love for the iconic long weekend event.

McNay and Blacksell Set for Annual Mallee Rally
